## MARINE SAE 20W-50 RACING OIL

Lucas Oil Marine SAE 20W-50 Racing Oil is specially formulated with extreme anti-wear protection to deliver the highest level of protection for your engine under the most severe conditions. Our advanced polymer modified oils develop a tougher, thicker lubricating film for ultra-low friction and increased power. Our formulation ensures lower oil temperatures during high-speed operation, which extends oil life and minimizes wear. Lucas Oil Marine SAE 20W-50 Racing Oil helps to maintain ring seal and clings strongly to piston cylinder walls to reduce wear and slow oil burning, improving fuel combustion, and reducing harmful smoke emissions. Our formulation resists oxidation and high temperature break down, making it the perfect oil for your racing motor. Lucas Oil Marine SAE 20W-50 Racing Oil is compatible with methanol and all racing fuels, and easily blends with any synthetic and non-synthetic oils.

### PART NUMBER AND SIZE:

10653 - 1 Quart (Case of 6)  
10810 - 5 Quart (Case of 3)  
10665 - 5 Gallon Pail (1 Pail)  
10666 - 55 Gallon Drum

### FEATURES AND BENEFITS:

- Excellent for use with supercharged, turbocharged or nitrous oxide boosted high performance engines.
- Safely blends and is compatible with synthetic and non-synthetic oils.
- Contains premium anti-wear agents and proprietary polymer technology to provide the ultimate performance.
- Proven performance in marine applications.
- Compatible with methanol and all racing fuels.

### MAIN APPLICATIONS:

Lucas Oil Marine SAE 20W-50 Racing Oil is designed for use in high performance boats requiring the ultimate protection.

## TYPICAL PHYSICAL CHARACTERISTICS:

PROPERTIES	ASTM	TYPICAL
API Gravity	D4052	26.4
Specific Gravity @ 60°F	D4052	0.896
Density @ 60°F, Lbs/US Gal	D4052	7.46
Viscosity @ 40°C cSt	D445	166.1
Viscosity @ 100°C cSt	D445	19.5
Color		Amber
Flash Point COC °F	D92	425

These characteristics are typical of current production. However, slight variations in these characteristics may occur.
